IMPORTANT: The ACEB Membership Directory is published annually and is the foremost resource for information on leading companies in the consulting engineering industry space. It includes ACEB members at national level, with some having a foothold regionally and globally. These member firms subscribe to the ACEB objectives and principles as described in this informative directory. An online version of the Directory is readily available and can be accessed on our website at <http://www.aceb.org.bw>

FOREWORD

*Dear Colleagues, Partners,
Collaborators, Stakeholders,
Clients and ACEB well-wishers*

As it is annual tradition of the Association of Consulting Engineers Botswana (ACEB), we present a directory of our member firms for the year 2025/2026.

The year 2025/2026 is a challenging year for the consulting industry, characterised by major changes in the procurement landscape. All the same, we encourage our members to embrace the year and find the opportunities behind the challenges. We also encourage them to take initiative and be part of the solution as our industry story of overcoming and growth unfolds.

We implore all procuring entities and all other projects stakeholders to join hands with us and help make the industry a better business environment for consultants to operate in.

This is important for the simple reason that as the private sector advances, the whole nation progresses along with it.

The ACEB Directory presents a list of all the ACEB member firms, their contacts, and the services they provide. We believe that each one of these member firms subscribes to the ACEB's core values on integrity, professionalism, independence of judgement, sympathy for the environment and social responsibility. ACEB's membership is open to any engineering consulting firm registered in the country, according to the membership rules. Services offered by ACEB membership cover a wide spectrum of services that include civil, structural, infrastructure, electrical, mechanical, water, sewer, geotechnical engineering, contract administration and project management.

Kenne Botshologile
ACEB President

OBJECTS OF ASSOCIATION

The key objects for which the Association is established are:

1. To promote the advancement of the profession of consulting engineers.
2. To participate in the national and international affairs which affect the profession.
3. To enhance the collective reputation and economic vitality of the Members of the Association.
4. To provide Government, public bodies and others with facilities for conferring with and ascertaining the collective views of consulting engineers.
5. To improve the quality of life for all by the promotion of superior engineering knowledge and skills and their application to projects with professionalism, integrity, independence of judgement and sympathetic consideration of the environment.
6. To confer with associations representing fellow professions, manufacturers, contractors and other persons engaged in engineering works on matters of common interest.

VISION & MISSION

VISION

To be the voice of the Consulting Engineering Industry in Botswana.

MISSION

To improve the business climate and guide the consulting engineering industry through the promotion of superior engineering knowledge, skill and innovation for the benefit of Botswana.

ACEB CORE VALUES

INTEGRITY

Member of ACEB shall at all times conduct themselves honorably, ethically and lawfully so as to enhance the honor, reputation and usefulness of the profession and act in the legitimate interest of the client, providing all services with integrity and faithfulness.

PROFESSIONALISM

Members shall apply their skill and knowledge in the interest of their employer or client for whom they shall act as faithful agents or advisers, without compromising the welfare, health and safety of the community.

INDEPENDENCE OF JUDGEMENT

The ACEB members shall be impartial in the provision of professional advice, judgement or decision and shall neither offer nor accept remuneration of any kind which in perception or in effect either

- a) seeks to influence the process of selection or compensation of consulting engineers and/or clients or
- b) seeks to affect the consulting engineer's impartial judgement.

SYMPATHY FOR THE ENVIRONMENT

Members shall seek solutions that are compatible with the principles of sustainable development and environmental responsibility.

SOCIAL RESPONSIBILITY

Members shall uphold, and assist others to uphold the dignity, standing and reputation of the consulting industry, take all reasonable steps to protect life and to safeguard the community.

WHAT IS ACEB?

Since Botswana independence in 1966 the establishment of consulting engineering firms was a slow process, which gathered momentum during the late 1970's to the present day where over 20 firms now maintain permanent offices mainly in Gaborone.

In 1984 representatives of interested firms suggested the formation of an association and membership criteria was established, constitutional matters were addressed and membership was expanded.

A core of dedicated firms and members persevered through periods of mixed interest and fluctuating membership until mid-1993 when formal registration was approved and the association was finally born after a long period of gestation.

Current membership is over 50 firms with the possibility of new applications in the near future and close contact has been maintained with FIDIC. Implementation of the objects of our association is a major task to be undertaken by Council together with the establishment of a communication forum with representatives of the government departments most often serviced by our members. An understanding of the roles to be played by other professional organisations has been recognised by council and closer contact will be developed in the future.

ACEB is represented at FIDIC Africa which cater for associations affiliated to FIDIC throughout Africa, and regular developments are shared with other associations beyond our borders by way of personal contacts through our member firms who are also represented internationally.

The promotion of independent judgement, high levels of professional expertise, quality management assurance and environmental awareness are issues, amongst others, which must be vigorously pursued as vital aspects of any meaningful awareness campaign for the benefit of our client body and our community of large.

The promotion of consulting engineering as a professional career will be a subject for discussion during contacts with the institutes of further learning, study of the aims and objectives of the Association signify a comprehensive environment in every facet of development projects as they involve the services of independent consulting engineers.

The Association of Consulting Engineers Botswana must be sensitive to the needs of member firms involved in such work and to the community which ultimately inherits the product of their endeavors.

WHAT IS FIDIC?

FIDIC is an international FEDERATION OF National Associations of Independent Consulting Engineers. FIDIC was founded in 1913.

FIDIC represents globally the consulting engineering industry and enhances the image of the consulting engineer.

FIDIC is an authority on issues relating to the business practice of a consulting engineer. FIDIC promotes the development of a global and viable consulting engineering industry.

FIDIC promotes quality, conformance to a code of ethic and to integrity and is committed to sustainable development.

Today FIDIC members 100 countries from all parts of the globe and the federation represent most of the independent practicing consulting engineers in the world, representing nearly 1 million staff.

FIDIC arranges seminars, conferences and other events in the furtherance of its goals; maintenance of high ethical and professional standards; exchange views and information; discussions of problems of mutual concern among member associations and representatives of the international financial institutions; and development of the engineering profession in developing countries.

FIDIC publications include proceedings of the various conferences and seminars, information for consulting engineers, project owners and international development agencies, standard pre-qualified forms, contract documents and clients/ consultant agreements. They are available from the Secretariat in Switzerland.
